Jenkinsfile – Build, Test and Deploy Pipeline

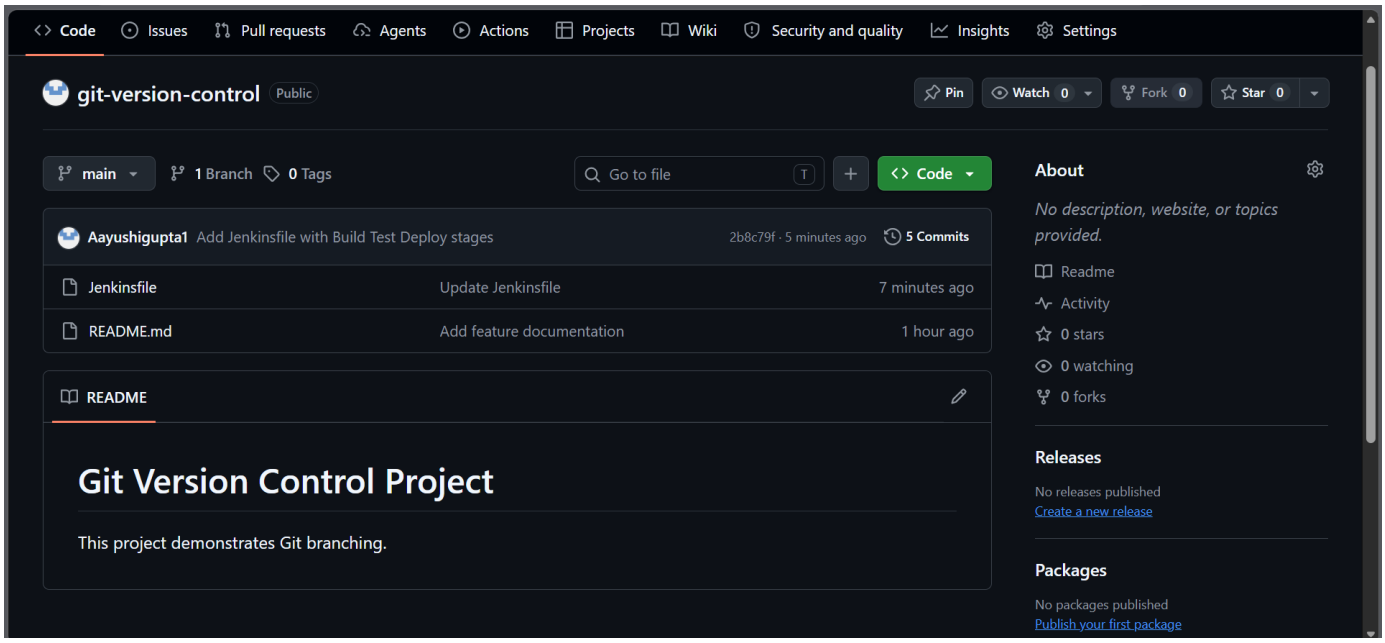

Step 1: Create the Jenkinsfile with Build, Test and Deploy stages.

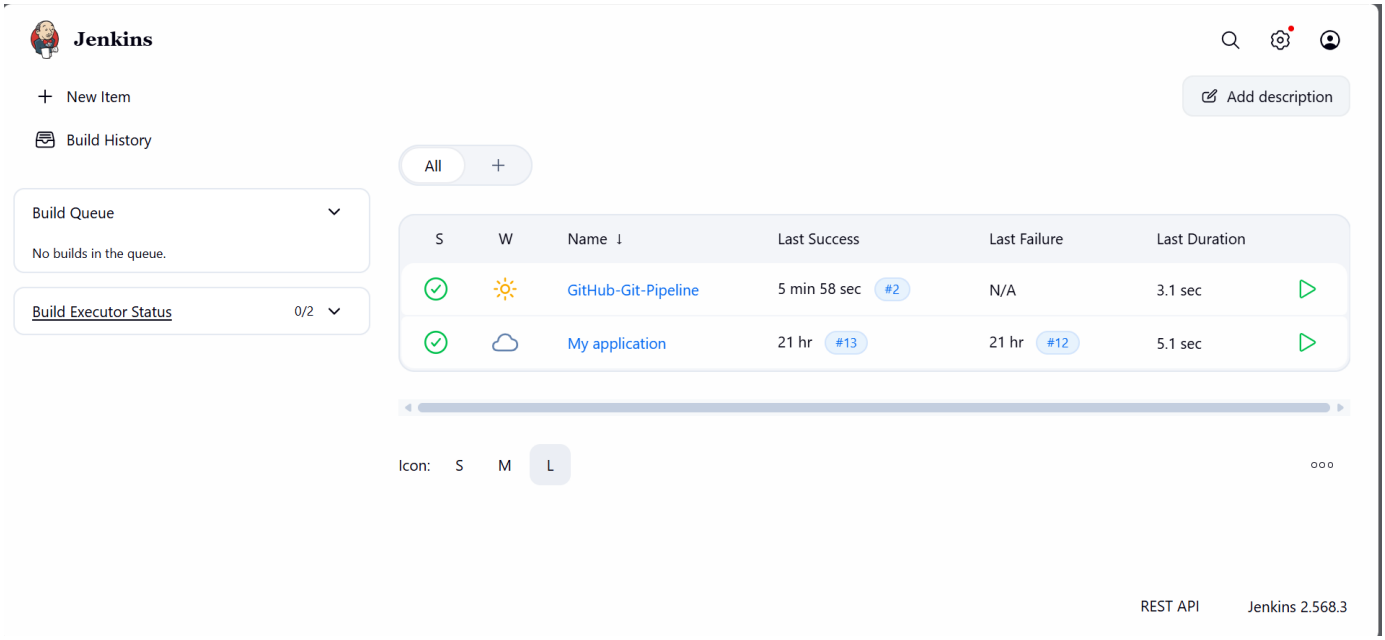

Step 2: In Jenkins, set the Script Path to Jenkinsfile.

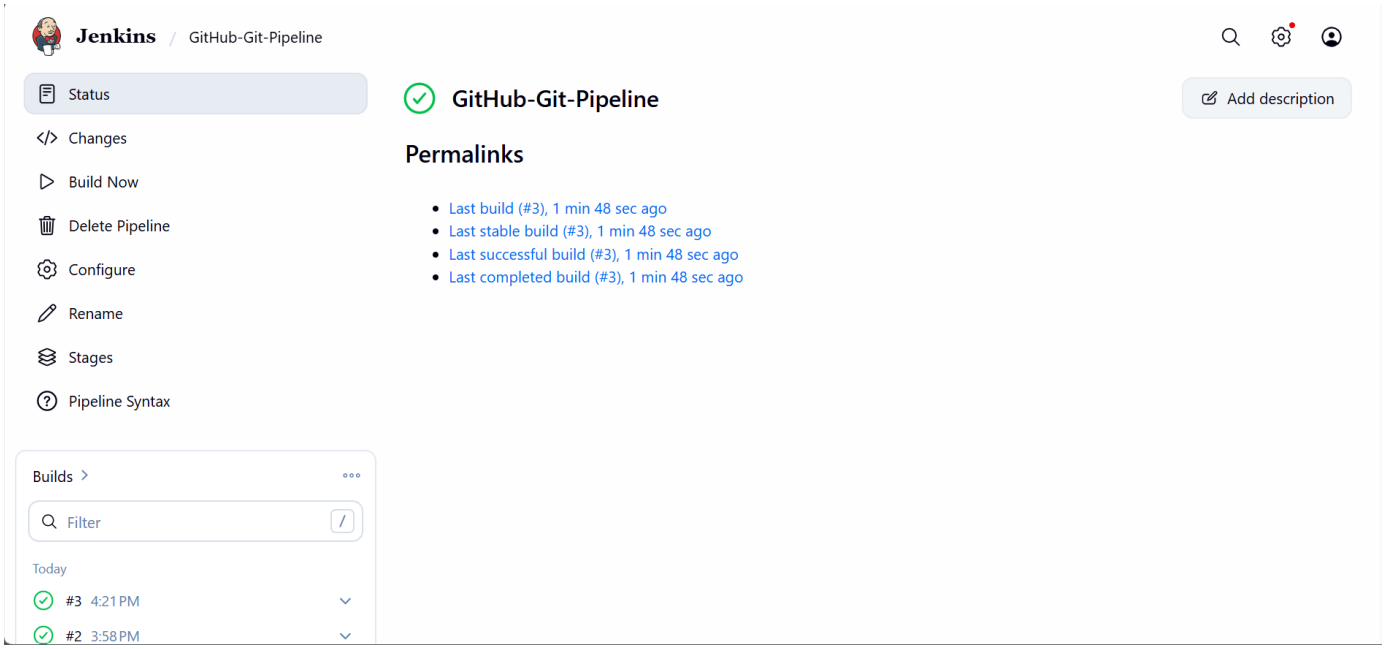

Step 3: Verify that Jenkinsfile is present in the GitHub repository.

Step 4: Save the Jenkins Pipeline configuration.

Step 5: Click Build Now and verify the successful pipeline build.

Step 6: Open Console Output and confirm Build, Test and Deploy completed successfully.
